PROFESSIONAL SUMMARY

Machine Learning Engineer with 6+ years of experience delivering deep learning solutions across digital health, generative AI, and computer vision. At Samsung Brasil, I work on the development and commercialization of AI models for wearable devices, supporting sleep and wellness products with production-ready ML pipelines and applied research. Delivered measurable impact at Globo through LLM-driven customer experience optimization and scalable MLOps pipelines. Expert across the full ML lifecycle: feature engineering, model architecture (CNN, RNN, Transformers), MLOps deployment, and production monitoring. PhD researcher in medical AI (teledermatology + NLP), with strong academic recognition and industry execution.

PROFESSIONAL EXPERIENCE

Samsung Brasil | Oct 2025 - Present

AI R&D Specialist - Digital Health & Sleep Analysis

- Architected CNN and RNN-based models for multi-class sleep stage classification using large-scale physiological signals (EEG, heart rate, accelerometer), supporting Samsung's digital wellness roadmap, contributed to 1 production-grade model pipeline.
- Engineered end-to-end feature engineering pipelines for biometric signals across 3 signal modalities, improving model robustness and enabling production deployment.
- Led literature reviews on biosignal ML, translating state-of-the-art research into model improvements that increased classification accuracy by driving architecture iteration cycles.
- Collaborated cross-functionally with hardware, health research, and software teams to integrate ML models into Samsung health platforms.

Globo | Mar 2024 - Sep 2025

Data Scientist - GenAI & Customer Experience

- Developed and optimized 2 LLM-based chatbot flows using OpenAI GPT-4 and Gemini to improve automated customer support experiences and reduce handoff from bot to human agents.
- Worked primarily on chatbot journeys related to Brazil's Consumer Defense Code (CDC), improving answer quality and intent handling across customer support scenarios.

- Monitored 2 key performance indicators (NPS and CSAT) and designed A/B tests to evaluate the impact of GenAI-driven improvements on customer satisfaction and service quality.
- Built ETL pipelines in BigQuery processing millions of daily events and created 5+ Looker Studio dashboards to support analytics, experimentation, and business decision-making across teams.

ClearSale | Dec 2022 - Oct 2023

Machine Learning Engineer - Antifraud, Databricks Lakehouse & MLOps

- Built 3 PySpark pipelines for **antifraud** use cases over high-volume transaction streams, reducing latency and supporting real-time scoring.
- Designed reusable feature pipelines in **Databricks Feature Store** and **Lakehouse** architecture, supporting 5+ ML models in production.
- Orchestrated **MLflow-based experiment tracking**, model registry, and CI/CD workflows in **Databricks + Azure**, reducing deployment time from days to hours.
- Implemented governance and monitoring controls for production ML systems, ensuring traceability, compliance, and operational stability.

PixForce | Apr 2022 - Nov 2022

Computer Vision Engineer - Startup, Stakeholder Delivery & Deployment

- Delivered **3+ concurrent** end-to-end computer vision projects in a startup environment, from KPI definition and dataset curation to model deployment.
- Worked directly with stakeholders to define requirements, validate scope, and align ML solutions with client needs.
- Managed dataset capture, annotation, and quality control for custom CV problems.
- Designed deep learning architectures using state-of-the-art computer vision methods for problem-specific applications.
- Deployed production-ready models at client sites, including 2 OCR and facial recognition pipelines.

Compass UOL | Mar 2019 - Aug 2019

Backend Developer - Chatbot, Cloud & BI

- Built chatbot solutions with **JavaScript** and Google ecosystem tools, deployed on **Azure**, for large Brazilian enterprises with strong market relevance.
- Contributed to chatbot flow development, cloud integration, and system maintenance.
- Engineered data pipelines and collected business information for reporting and analytics.
- Built dashboards in **Power BI**, **Tableau**, and **Oracle SQL** to track financial metrics and commercial impact.

EDUCATION

PhD in Applied Computing (In Progress, Exp. 2026) - Universidade do Vale do Rio dos Sinos (Unisinos)

Started in 2020 in Computer Science at the **Federal University of Rio Grande do Sul**

(UFRGS) and transferred in 2023 to Unisinos to complete the research in Applied Computing, which better aligned with the scope of the thesis and ongoing projects.
Research: NLP + Computer Vision for teledermatology datasets in medical AI.
Highlights: **1st Place Best Paper Award - Sociedade Brasileira de Computação (SBC)**

M.Sc. in Computer Engineering - Universidade Federal do Rio Grande (FURG), 2017–2019

Thesis: Fuzzy logic for neural network enhancement in Computer Vision.

Academic exchange: University of Navarra, Spain. Highlights: **2nd Place Best Paper - NAFIPS 2018 and Outstanding Student Paper Award - NAFIPS 2019**

B.Sc. in Information Systems - Faculdades Integradas de Cacoal (UNESC), 2013-2016

Monograph: study on the application of **fuzzy logic** in the animal feed industry using by-products such as bone meal and meat meal.

Technologist in Systems Analysis and Development - Faculdades Integradas de Cacoal (UNESC), 2013-2015

Monograph project: development of a complete system using **Embarcadero Delphi** for the deposit and management of seized assets for the **Federal Police of Rondônia**.

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, R, JavaScript, MATLAB

Machine Learning & Deep Learning: PyTorch, TensorFlow, Scikit-learn, Keras, OpenCV, Hugging Face, CNNs, RNNs, Transformers

MLOps & Cloud Platforms: MLflow, Databricks, Spark, PySpark, Azure ML, BigQuery, Docker, CI/CD, Azure DevOps

Experiment Tracking & Monitoring: MLflow Tracking, model registry, model monitoring, Grafana, logging, metrics dashboards

Data Engineering & Analytics: Pandas, NumPy, feature engineering, ETL/ELT, data pipelines, Looker Studio, Power BI, Tableau, Oracle SQL

GenAI & NLP: GPT-4, Gemini, ClinicalBERT, BioBERT, LLM integration, chatbot development

Computer Vision & Applied AI: Object detection, OCR, facial recognition, segmentation, medical AI, teledermatology, sleep analysis, customer experience AI

Tools & Collaboration: Git, Jupyter, Salesforce, Google Cloud ecosystem, Azure DevOps
